

Tailored digital solutions for growing businesses.

Websites, applications, and software – designed around your customers,
your processes, and your goals.

THE CHALLENGE

Growing businesses often outgrow their websites and digital tools.

- The website no longer reflects what the company has become.
- Customers can't find a clear next step – so they hesitate, or leave.
- Bookings, inquiries, and payments live in separate, disconnected tools.
- Routine work is still done by hand, week after week.
- Generic templates make the business look like everyone else.

THE GOAL

Good digital solutions make business easier – for your customers, and for you.

● For your customers

A first impression that matches your quality

A presence that shows the level you actually work at.

A clear path to action

From interest to inquiry, booking, or purchase – without friction.

Clear and consistent on every screen

As clear on a phone as it is on a desktop.

● For your business

One connected system

Website, bookings, payments, and tools that work together.

Fewer manual steps

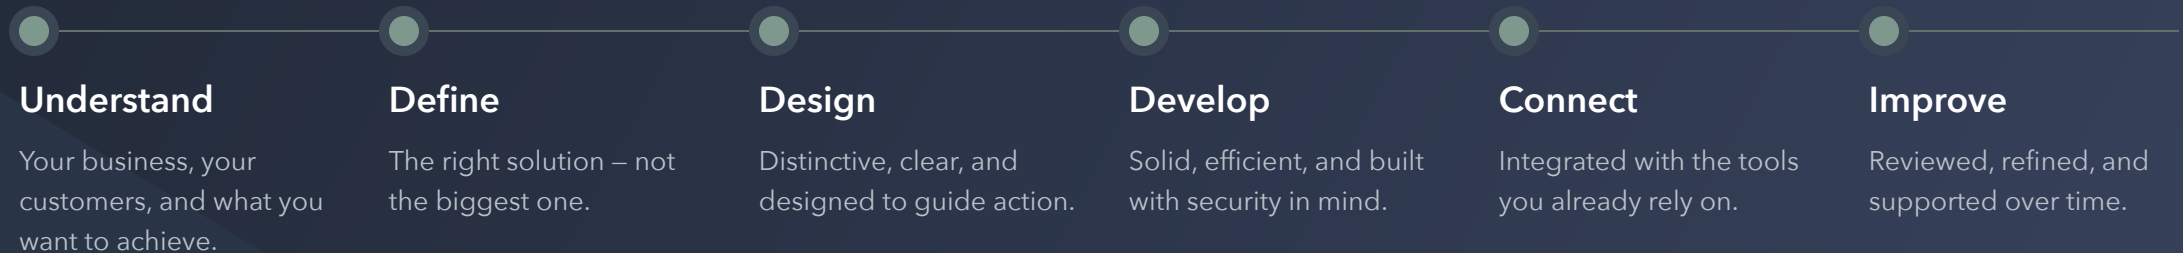

Routine tasks handled automatically in the background.

Room to grow

A foundation that scales with the business instead of holding it back.

THE APPROACH

Strategy, design, and development in one connected process.

Every project starts with your business objective – never with a template or a predefined tool.

Built around your business. Not around a template.

There are many ways to get a website or a piece of software. This is what makes working with ClarroxWeb different.

ONE ACCOUNTABLE PARTNER

Web design & development · Software & applications · AI-assisted workflows · SEO, analytics & digital growth support

TAILORED DIGITAL SOLUTIONS

01 Tailored, not generic

Designed around your goals, your customers, and how you work.

02 Business first, pixels second

We start with the business outcome – design and technology follow.

03 One partner for web and software

Websites, applications, and integrations from the same team.

PERSONAL DELIVERY & ONGOING SUPPORT

04 Direct contact with the makers

You talk to the people doing the work. No layers in between.

05 Your tools can stay

We connect the systems you already rely on instead of replacing everything.

06 Support that continues

Hosting, updates, and further development – long after launch.

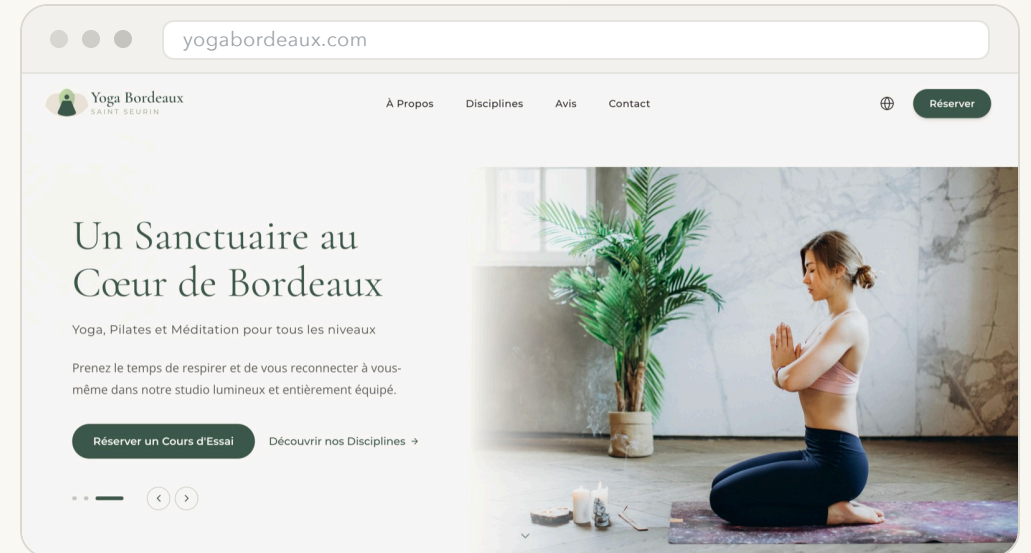

Digital experiences built around how customers choose.

- Custom design that makes your business distinctive
- A consistent experience across phones, tablets, and desktops
- Booking, shop, and inquiry journeys built in
- A search-friendly foundation, structured for organic visibility

See the direction before you decide.

- We create an initial visual direction for your new site
- You review it before committing to anything
- Scope and price are agreed only if you choose to proceed

Available for selected website projects. It is an initial design direction, not a completed website.

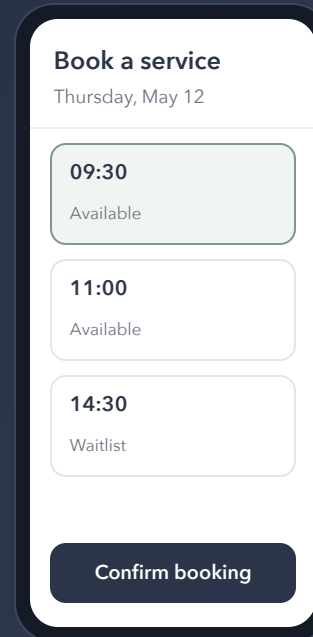

Yoga Bordeaux – a calm, on-brand site built around trial bookings.

Software, apps and automation built around your business.

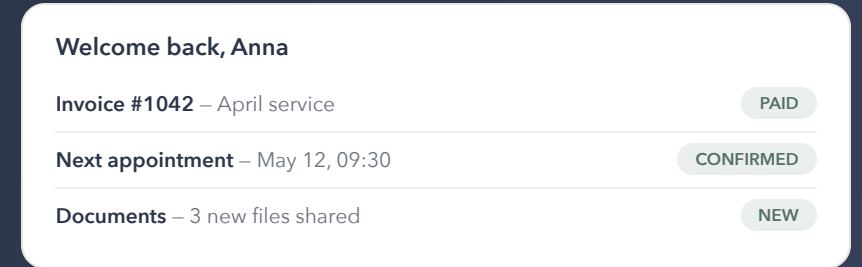

When off-the-shelf tools do not fit, we design connected digital solutions around your customers, teams and workflows.

- Web and mobile applications
- Customer and employee portals
- Internal business tools and dashboards
- Integrations between existing systems
- AI-assisted workflows and automation
- Ongoing development and optimization

Reporting

Illustrative solution concepts – not client systems

Connect your tools. Remove manual steps.

One inquiry can trigger a whole chain of routine work. Automation handles the routine – your team handles the customers.

WORKS WITH THE TOOLS YOU ALREADY USE

CRM

Email

Calendar

Payments

Invoicing

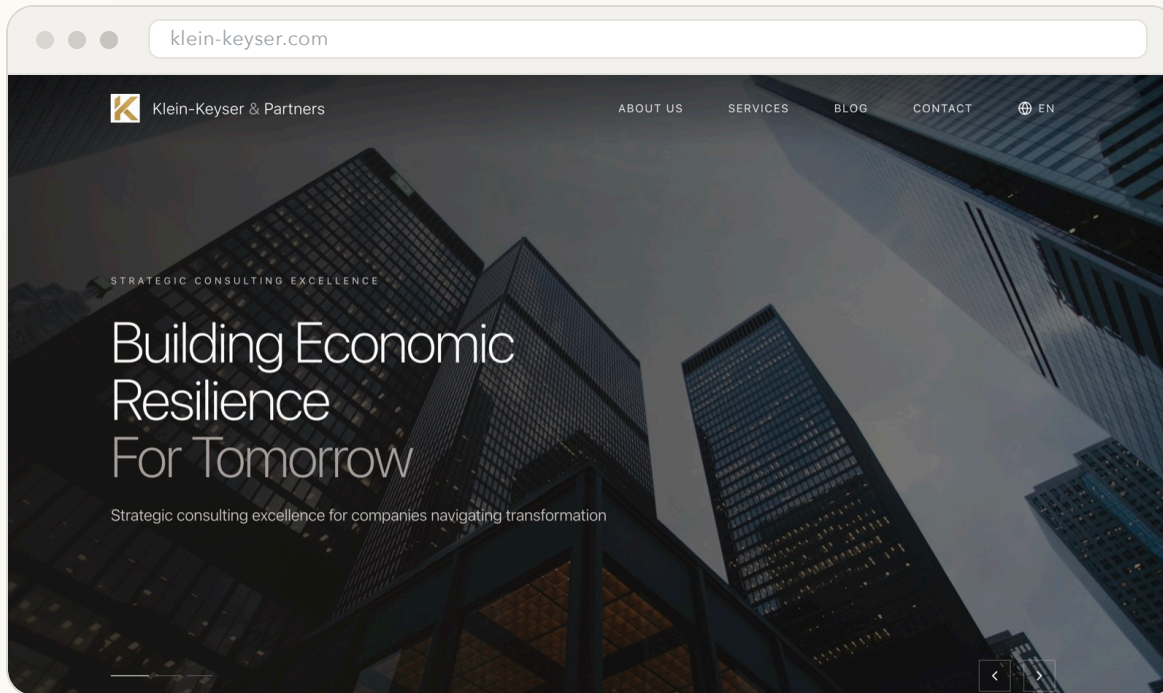

Reporting

Illustrative workflow – every automation is designed around your actual process.

SELECTED WORK

Real projects, built for real business goals.

FEATURED PROJECT

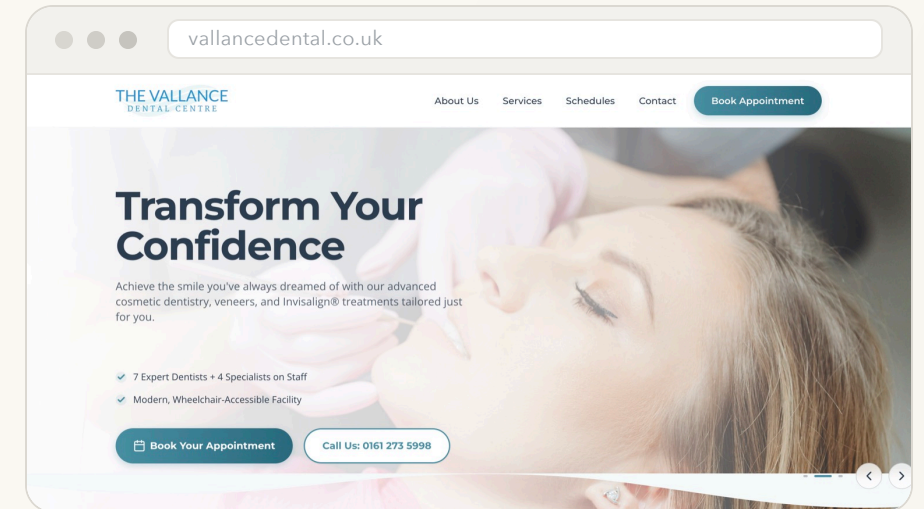

Klein-Keyser & Partners CONSULTING

An off-the-shelf template undersold a premium consultancy. We rebuilt the site from the ground up – a custom design with a clear structure and a direct path to contact.
